Health care

I found out a lot about health care in The United States. Here it's common that doctor's offices are grouped together. In one building there may be 50 or 100 doctor so fall different types. Health care is very expensive if you have health in surance it covers most of the costs, each time that you go to the doctor or buy medicine you pay a little bit and your in surance company pays the rest .UN fortunately, not every one has medical insurance , and it can be difficult to get good health care, some doctors charge very high fees, and if you aren't covered by health insurance , you can not have access to good medical care. Some states, fortunately, provide free health care for some illnesses.

Public hospitals are required by law to accept emergency cases. But emergency rooms are now a days full of patients with minor ailments like sore throats or colds because they can not afford a private doctor's visit.
